## Operational Safety

To operate effectively in any security environment, regardless of your assignment, you must be able to manage situations with confidence.

Having the appropriate skills to operate at all levels is an integral part of your operational requirements, ensuring your safety and the safety of others.

All good tactical training must fulfill 3 essential criteria – it must be *simple, effective* and *defensible*.

If you have no previous training in control and defense tactics, these courses are essential. If you already have some defense skills, these courses will be of enormous benefit to you in adjusting and honing your current skills to the legal and operational requirements of the security industry.

When you are taken to a level you have no training in, you are in real trouble, both physically and legally! Security is about being prepared for any situation. Don't wait until it's too late to find out you weren't!

If you are serious about your personal safety and working as a security professional, these courses are a *must!*
